

THE RHODE ISLAND ENERGY EFFICIENCY & RESOURCE MANAGEMENT COUNCIL  
invites you to join us for the first installment of our

## 2021 EERMC Energy Lecture Series

“**SHOW ME THE MONEY!**”

How to save on your utility bills through energy efficiency.

As home heating costs are expected to spike this winter, Rhode Islanders are looking for ways to cut costs on their utility bills. The good news: There are several simple steps you can take **right now** to increase your energy efficiency and save money.

For the first installment of our 2021 Energy Lecture Series, the Rhode Island Energy Efficiency & Resource Management Council (EERMC) is excited to welcome RISE Engineering for a virtual discussion on energy efficiency. We'll cover everything from LED bulbs, to insulation, to air-sealing, and teach you how to reduce your carbon footprints and “future-proof” your home in today's rapidly changing energy landscape.

### Virtual Event

Thursday, October 28  
11:30 a.m.
