### OVERVIEW

Councilor Education and Advancement (CEA) meetings allow members to gather outside of the formal monthly meetings for deeper learning and open discussions. Topics are driven by current priorities and often include a mix of Council responsibilities, timely efficiency planning considerations, and deeper dives into evolving efficiency issues and innovations. All members are expected to attend, and meetings are open to the public. In February 2022, the Consultant Team surveyed Councilors to collect input on how to design this year's CEA meetings to be most productive and beneficial.

Council members should review the agenda, objectives, and all other materials provided in advance, and be prepared to discuss. This is intended to be a highly participatory session.
